

TANDEM SKYDIVE

The tandem training method allows you to freefall harnessed to a licensed instructor, who guides you to the ground. This jump, made from as high as 13,000 ft, is an excellent introduction to skydiving!

First Jump **\$190 cash***
 \$200 cc/atm*

Reservations and \$50 advance deposit are suggested for individuals and required for large groups and group discount. Plan on a 4 to 5 hour commitment including training. Deposits become non-refundable 7 days before the scheduled class time. Remember, while walk-ins are always welcome, reservations with deposits have priority.

Group Discount \$20 off – groups of six or more, reserved and deposited as a group, receive a \$20 per person discount.

Please call for schedules & appointments.

SOLO SKYDIVE TRAINING

Have you made a tandem and now are ready to learn to skydive? If yes, you can start with a four hour ground school followed by two instructor-assisted solo skydives (also known as AFF), made from as high as 13,000 ft. The “Solo Freefall Training Program” covers such crucial elements as body position, altitude awareness, canopy control and emergency procedures. You will skydive with two licensed instructors at your side, and you will deploy and land your own parachute with radio assistance for back up.

Solo Ground School **\$125 cash**
 \$130 cc/atm
Two AFF Skydives **\$450 cash**
 \$470 cc/atm

Reservations, a prior tandem within 6 months and \$100 pre-payment required to enroll.

IMPORTANT INFORMATION

Bring Valid Government Issued Photo ID

You must:

- Be 18 years or older. (Sorry, under 18 with parental consent is not acceptable).
- Weigh less than 230 lbs. (men) or 200 lbs. (ladies) in good physical shape for your size
- And be physically fit, in good health.

Persons having a recent injury or illness or taking prescription drugs that would require a doctor's evaluation, must have a doctor's certification stating that no adverse effects would result from vigorous activity or making a skydive.

Payment Methods: We accept Cash, ATM / Debit, Visa, Discover & MC.

*** Prices and schedules subject to change without notice. Call or check our website for the latest information. Effective 3/17.*

An unbelievable rush awaits you at the door of our plane. 13,000 feet above the Willamette Valley, the light goes on, the door opens and the jumping begins. Suddenly, it's your turn...

You and your licensed tandem freefall instructor head to the door – your very next step will be one of the most memorable in your life.

As the wind rushes by you in free fall your heart races with the majesty of human flight. Under a highly maneuverable parachute, you are greeted by panoramic views of Mt. Hood, St. Helens and the Cascades. A glance at the earth reveals endless patches of farmland. Once on the ground, you will never see the sky – or yourself – in the same way again.

Safety is the most important consideration in choosing a parachute center. Skydive Oregon, Inc. has a 100% student safety record since opening in 1988. Large, comfortable aircraft, modern parachute equipment, a great landing area and experienced instructors licensed by the U.S. Parachute Association are why thousands of first time jumpers place their confidence in Skydive Oregon.

Located just 25 miles South of Portland and 25 miles North of Salem, Skydive Oregon provides the most advanced free fall training programs in the world. And it's all just minutes away.

Frequently Asked Questions

What do I need to bring with me? Please bring your government issued photo ID – Drivers license, State ID or passport. *You will need your ID in order to skydive.* For payment - cash, Visa, Mastercard, Discover, ATM or bank debit cards.

What will I experience during the skydive? Free fall is up to 60 seconds of breathtaking flight, followed by a peaceful and quiet 5 – 7 minute parachute descent.

What will it feel like when the parachute opens? As the parachute opens you slow from 120 miles per hour to 10 mph in just a few seconds, you'll go from the roar of free fall to the sublime silence of parachute flight.

Are there safety back-ups if the first parachute doesn't open properly? Each parachute system contains two parachutes, a main and a reserve. In the unlikely event that the main parachute does not open properly, there is a second or reserve parachute. The reserve is inspected and packed by a licensed FAA parachute rigger. Additionally, Skydive Oregon uses automatic reserve parachute activation devices as a back-up safety system.

Will I be scared? The anticipation of the jump as you poise at the aircraft door will be the memory of a lifetime. Some are afraid, some are excited, some are calm and some can't wait. All new jumpers describe a heart-pounding exhilaration when they realize they are about to leap into thin air.

What kind of parachute will we use? Gone are the days of the old round parachutes. Skydive Oregon uses large, square, highly maneuverable "ram-air"

canopies specifically designed for safety, comfort and flight control.

I've heard the landing is like jumping off a 2-story building? In the early days of sport parachuting, landings were often quite hard. Modern ram-air canopies allow for softer landings, like stepping off a high curb or a gentle slide.

What should I wear? Dress in comfortable, weather appropriate clothing. Wear athletic shoes without open toes or hooks. No sandals or hiking boots or clunky high heels.

I am a little overweight. Is this a problem? Skydiving is a sport for healthy people who have an active life and are in good shape for their size and age. Please call us if you have questions on making a skydive.

Can my friends jump with me? Yes! Skydive Oregon serves hundreds of groups each year. Groups of four to six can usually be accommodated on the same aircraft, depending upon the number of video requests, weather conditions, instructor availability, etc. Larger groups may be on separate aircraft. Every effort is made to make group loads consecutive so everyone can enjoy the excitement. Groups are asked to provide advance notice and deposit to insure timely instructor availability. Groups of six or more qualify for a \$20 per person group discount when reserved and deposited in advance.

What time will I jump, so my friends can watch? Tandems usually jump within 3 to 5 hours of their scheduled class time, as weather, instructor and equipment availability permit. We try our best to accommodate all special requests, so sometimes things take a little longer and patience is appreciated.

Is there a place for my friends to wait and watch? There is a large spectator viewing area with shade pergolas and picnic tables.

It is directly across from the aircraft loading zone and the parachute landing area. Children are welcome as long as they are with a parent or guardian at all times. Remember to bring the camera and a picnic.

May I bring my dog? Please leave all pets at home where they will be more comfortable. Please pass the word along to spectator friends as well that there are No dogs allowed and the wait in the car can be hot and lonely and no areas to walk.

Can I get video and photos of my skydive? Yes! A video qualified instructor can record your extraordinary experience including some pre and post jump shots in addition to shots in freefall and even under parachute. You will receive a USB stick with 80 to 100+ digital photos and the raw HD video footage of your skydive so you can edit and share. Video/Photo package is \$100 cash or \$105 cc/debit.

Can I take a camera with me on the jump? Unfortunately that is not possible. Personal cameras of any kind are not allowed with you on the aircraft for your and your instructor's safety. The USPA requires that you have a minimum of 200 skydives before skydiving with a camera.

What if the weather forecast is bad? All weather decisions are made the day of the jump. We don't jump in the rain or through the clouds, but we do jump on many partly cloudy / partly sunny days. If the weather looks marginal, please call before you head out, for the latest jump information.
